# PLANNING GONE MAD!

## NO TO 68,700 NEW HOUSES BY 2026

*The SW Regional Spatial Strategy (RSS) aims to massively increase house-building in Cornwall.*

- *We object to the construction of 68,700 new properties in the next twenty years which would mean the equivalent of one new house for every four existing properties in Cornwall.*
- *This will have an unacceptable impact on our environment, Cornwall's communities and infrastructure.*
- *We, the undersigned, call on central government to allow Cornwall's democratically elected representatives to decide what is right for our area and to deliver a housing strategy that focuses on providing affordable homes to meet local needs, instead of promoting unsustainable house-building for its own sake.*

**Further information:** The original RSS produced by the unelected South West Regional Assembly in 2006 proposed that 45,000 houses should be built in Cornwall up to 2026, but an 'Examination in Public' (unelected panel) has proposed that 68,700 houses should be constructed.

This petition is produced and sponsored by Mebyon Kernow – the Party for Cornwall. Please return to Mebyon Kernow, Lanhainsworth, Fraddon Hill, Fraddon, St Columb, TR9 6PQ.
